

GRANDFATHER POLICY

Anytime an installation or alteration is approved by the Cooperative, it is approved based on the current policy. If any policy is revised at a later date, it is the discretion of the Board of Directors as to whether Members will need to make modification(s) to their previously approved improvement.

If at a later date, at the discretion of the Member, there are any changes made to the previously approved alteration, these changes must comply with the current policy at the time of the change.

An Installation/Alteration Permit must be submitted and approved before the change is made.
